NA-11

USB adapter for controlling Fohhn Net devices via PC

Converters NA-11

The NA-11 Fohhn Net USB Adapter provides the foundation for configuring all devices connected in a Fohhn Net via a PC. Requiring no time-consuming installation of drivers, the adapter is recognized immediately on the USB interface and transmits the Fohhn Audio Soft commands to Fohhn amplifiers or speakers.

Main features

- Output of Fohhn Net signals via network cable (RJ-45) or XLR
- Several devices can be controlled and monitored simultaneously
- Suitable for very long cable runs
- Transmission of control signals to the stage also via microphone cable or a multicore

Available with the following color options

Black
